Hello everyone!

We prepared unofficial image for Mandriva 2011 RC2 with kernel 3.0 by MIB group. Note: because it is unofficial distro, it destined only for testing purposes. Mandriva 2011 will be with kernel 2.6.38.7, and later, after some period of testing, we will update kernel to 3.0. You may get Mandriva 2011 with 3.0 kernel from [here](#) .

Enjoy

:)
