▣ Leggere avviso in basso, subito sotto la lista dei pacchetti, perchè molto importante! ▣

Mandriva completa l'offerta della PowerPack 2009.1, mantenendo la promessa di rendere disponibile quando possibile un software di Lettore DVD completo e con licenza ufficiale, che andasse a sostituire il vecchio LinDVD adesso non più supportato ma prima incluso nelle precedenti versioni della PowerPack:

Così gli utenti della PowerPack, possono da adesso scaricare gratuitamente gli rpm necessari, loggandosi prima con il proprio account commerciale.

Il pacchetto è normalmente in vendita, e può essere acquistato da chi non abbia la PowerPack, sullo store della Fluendo

Fluendo DVD Player EUR 19.99

Powerpack 2009 Spring: DVD player is available!

Posto qui il testo intero, da me ricevuto per e-mail da Mandriva:

Following previous announcement about the DVD player in the Powerpack 2009 Spring, here it is!

Fluendo DVD Player is a software application specially designed to play DVD on Linux and then Mandriva Linux platform. Based on high quality standards you will find main fonctionnalities needed for daily use:

- * Full DVD Playback*
- * DVD Menu support*
- * Fullscreen support*
- * Dolby Digital pass-through*
- * Dolby Digital 5.1 output and stereo downmixing support*
- * Resume from last position support*
- * Subtitle support*
- * Audio selection support*
- * Multiple Angles support*
- * Support for encrypted discs*
- * Multiregion, works in all regions*
- * Multiple video deinterlacing algorithms*

To install your DVD player, it's really easy:

*1 - enter following url in your favourite web browser:
<https://dl.mandriva.com/rpm/comm/2009.1/i586/>
using your my account login to authenticate*

2 - clic on install software

3 - enjoy!

Thanks for your interest in Mandriva products.

Mandriva team

RPM list

x 32bit

fluendo-dvd-1.0.5-1mdv2009.1.i586.rpm

x 64bit

fluendo-dvd-1.0.5-1mdv2009.1.x86_64.rpm

ATTENZIONE:

Hanno dimenticato di comunicare che per l'installazione occorre avere anche avere una nuova gstreamer

Come si fa ad essere così distratti e casinisti...

x32bit

Changelog

* sab giu 06 2009 Anne Nicolas 8-1mdv2009.1

ASF improvements :

- demuxing now supports seeking in push mode.

ASF fixes :

- seeking around the very end of a media clip does not generate an error.
- some more metadata tags are mapped.
- DRM errors have been recategorized to be more explicit.

H264 fixes:

- Some old frame was coming out in some cases after a flushing seek, annoying for thumbnailing in Elisa.

AAC fixes:

- On some raw AAC clips the decoder was pretending to output 8 channels which is not possible.

MPEG2 fixes:

- Potential wrong timestamp prediction on certain clips.

MPEG4 improvements:

- Introduce some DivX specific workaround to the spec to pass DivX Inc PSNR tests.

- Performance optimization.
- MPEG4 fixes:
- Some old frame was coming out in some cases after a flushing seek, annoying for thumbnailing in Elisa.
- MMS fixes:
- Some regression in non blocking connect slowed down connection time.
 - Some MMS streams were not playing correctly. (Ticket #202)
- Windows Media RTP fixes:
- Support EOS with recent versions of GStreamer.
 - Fixed timing with recent changes in GStreamer.
- DivX3 fixes:
- Support some bogus fourcc from the Divx Media Format demuxer.
- AC3 fixes:
- dualmono cases handled correctly.
 - fixed a problem with audio track from DVD Sensation 2007 -> anthems -> 2005 and search to position 00:01:19
- MSB added:
- Added a source element to handle the Microsoft multicast streaming protocol.

sab giu 06 2009

Era già pronto e disponibile da giugno ma nessuna comunicazione:

Noi abbiamo dovuto scoprirlo per caso... rovistando tra le cartelle...

Troviamo alquanto insolito e strano l'uso di un repo per un solo rpm:

Sarebbe stato meglio inserirlo direttamente tra i file in /restricted

o almeno, se non potevano farne a meno, comunicarne l'esistenza!

Bah, non ci sono altre parole da dire, sono sempre gli stessi

Dalle mie parti si dice:

Cu nasci tunnu npò moriri quatratu!
