ROSA Fresh R8 is out!

The release comes with four separate desktop environments: the basic, proven and stylish KDE 4, GNOME 3, MATE and experimental Plasma 5.

R8 release is characterized by high stability, it will be supported by security updates for two years and is recommended to be installed on computers by even inexperienced users. It's based on kernel 4.1.25 with the ability to install proprietary drivers. Available as branches kernel 4.4 and 4.6.

R8 contains configured and ready to use suites of applications for everyday home use: office suite, graphics editors, audio and video, archiver, torrent client, and a remote control program.
