

KoverArtist 0.7.6 available for Mandriva Linux 2010.2

KoverArtist is a program for the fast creation of covers for cd/dvd cases and boxes. The main idea behind it is to be able to create decent looking covers with some mouseclicks.

KoverArtist è un programma che rende facile ed intuitiva la creazione di cover per cd e dvd.

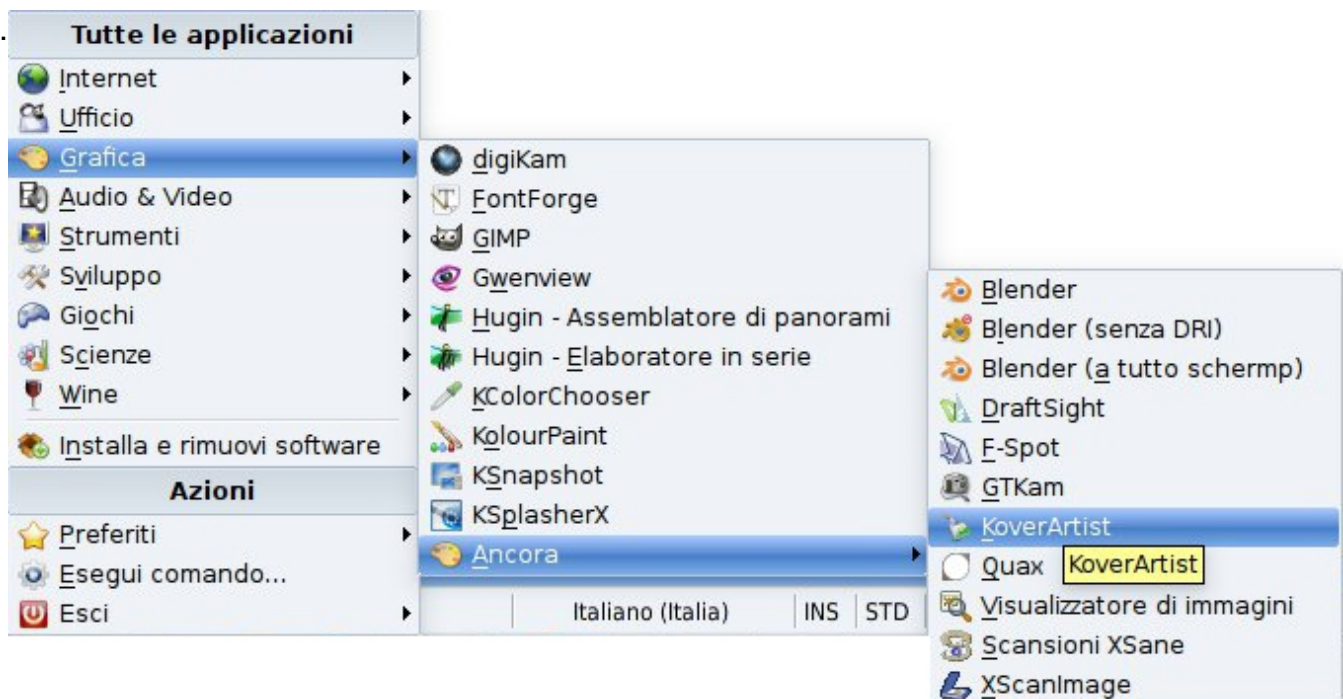

Già presente per Mandriva sino dalla 2008.1 è stato abbandonato.

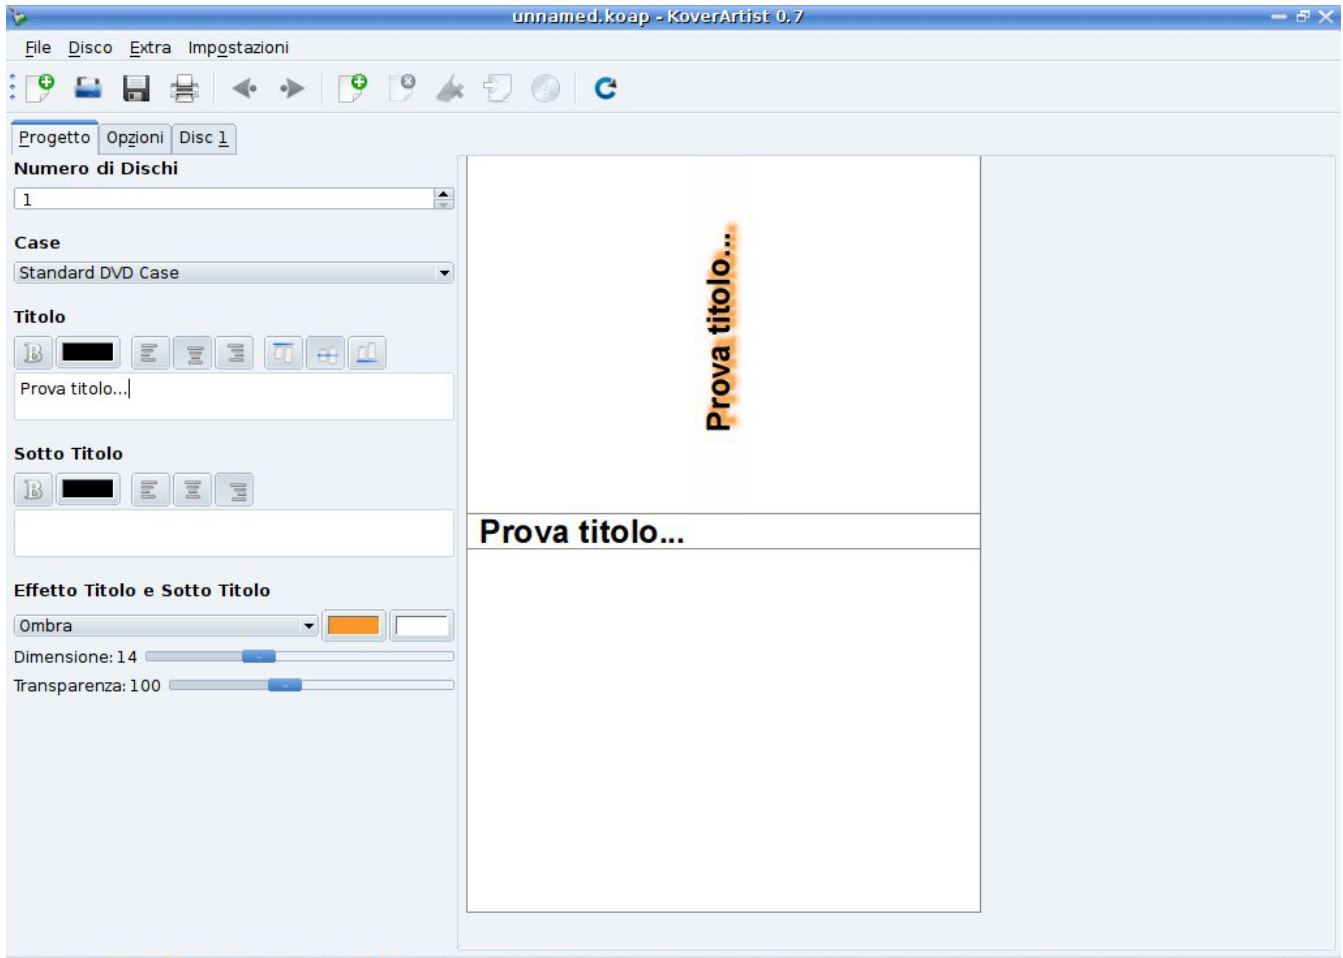

Essendo da poco terminato il porting per KDE4 ci è sembrato opportuno renderlo nuovamente disponibile per la nostra distribuzione.

The image shows the front and back covers of a DVD case for Star Trek: Deep Space Nine - Season 1. The front cover features a large, metallic, spherical structure resembling a Klingon Bird-of-Prey in space. The text 'STAR TREK DEEP SPACE NINE' is written vertically on the right side, with 'Season 1' below it. The back cover shows the main cast of the series in a blue corridor. The text 'Star Trek Deep Space Nine - Season 1' is at the top. Below the cast photo is a list of episode titles organized by disc: Disc 1 (Emissary, Part I; Emissary, Part II; Past Prologue; A Man Alone; Babel), Disc 2 (Captive Pursuit; O-Less; Day; The Passenger; Move Along Home), Disc 3 (The Nagus; Vortex; Battle Lines; The Storyteller; Progress), and Disc 4 (If Wishes Were Horses; The Forsaken; Dramatis Personae; Duet; In the Hands of the Prophets).
