

MountISO 0.9.5 per Mandriva 2008.1 (2009.1 da MCNL)

MountISO 0.9.5 è un servicemenu per kde che permette una serie di azioni con immagini ISO, NRG (Nero Burning ROM), UDF (DVD), CUE/BIN, CCD/IMG/SUB (CloneCD), XDVDFS (XBOX), MDF.

Requested rpm: from cocolapin2007 user, [here](#) the Forum link.

Official website: <http://kde-apps.org/content/show.php/MountISO?content=11577>

Description:

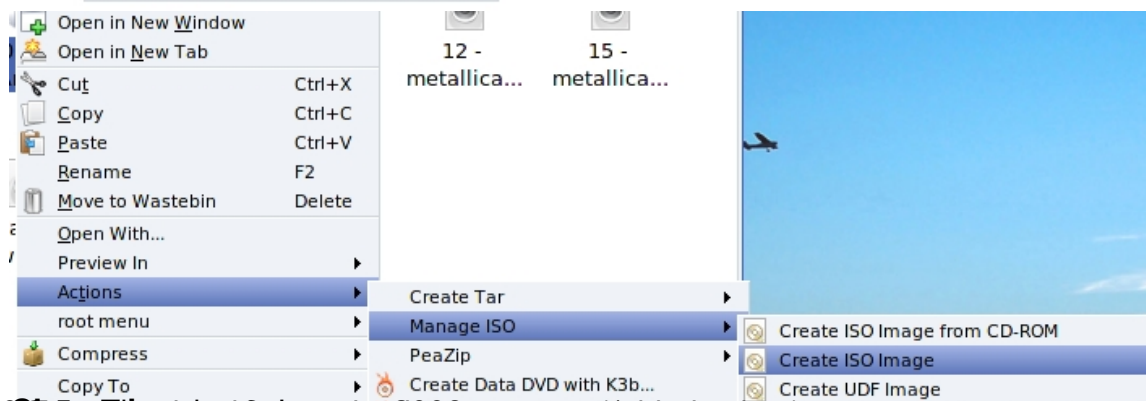

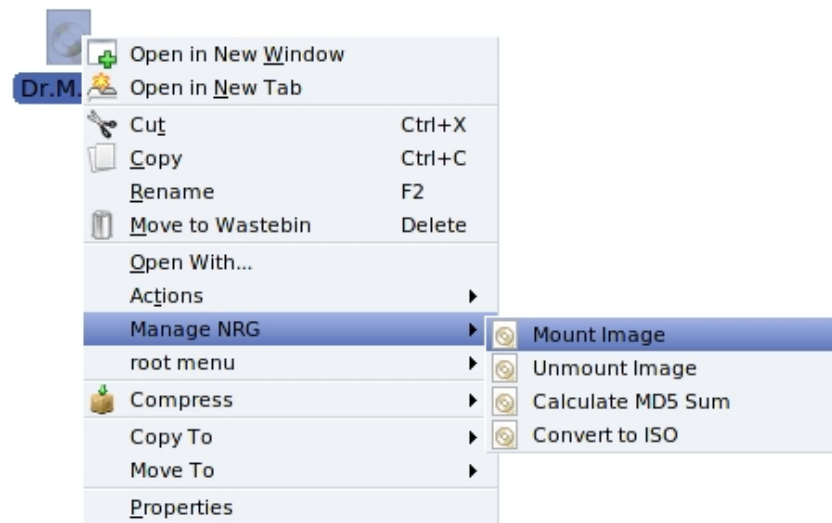

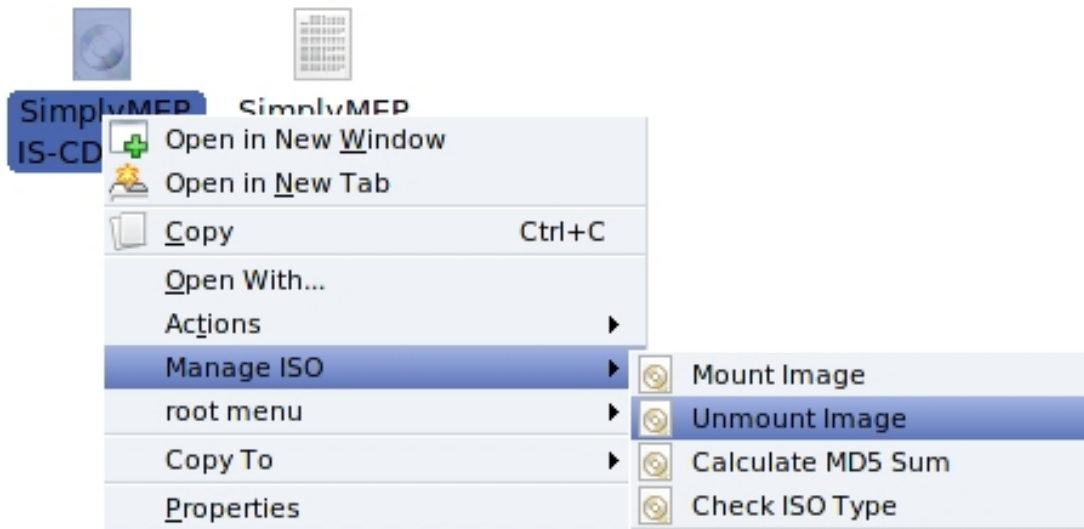

Mount ISO Image is an advanced script which allows to perform multiple operations with ISO, NRG (Nero Burning ROM), UDF (DVD), CUE/BIN, CCD/IMG/SUB (CloneCD), XDVDFS (XBOX) and MDF images.

Mount/unmount operations can be performed in two different ways: using kdesu or sudo. During the installation you'll be offered to choose a variant to use.
