

Firefox 7.0.1 per Mandriva 2009.1, 2010.2 e 2011.0.

Homepage: <http://www.firefox.com/>

Ecco qui le [Note](#) di rilascio per la versione 7.0.1

## What's New in Firefox

The latest version of Firefox has the following changes:

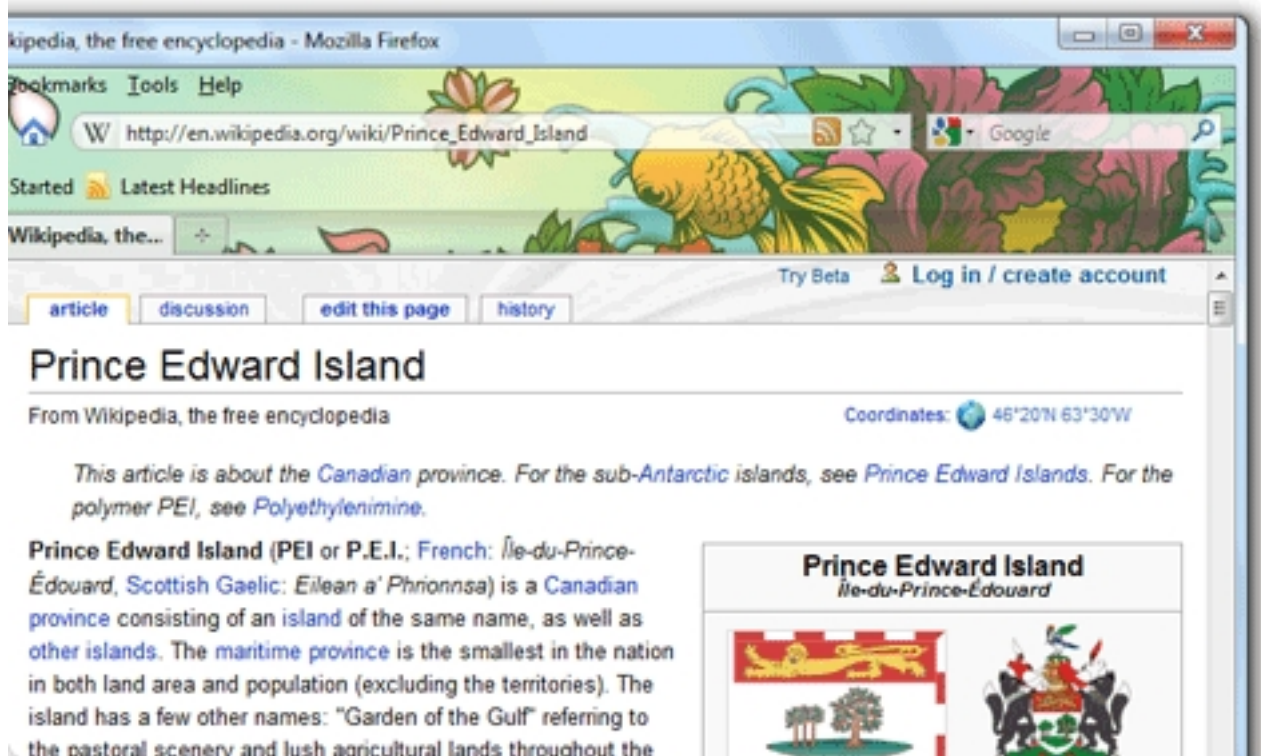

- Fixed a rare issue where some users could find one or more of their add-ons hidden
- after a Firefox update (see [the blog post](#) )

The previous version of Firefox introduced the following changes:

- Drastically improved [memory handling](#) for certain use cases
- Added a new [rendering backend](#) to speed up Canvas operations on Windows systems
- Bookmark and password changes now sync almost instantly when using Firefox Sync
- The 'http:/' URL prefix is now hidden by default
- Added support for [text-overflow: ellipsis](#)
- Added support for the [Web Timing specification](#)
- Enhanced support for [MathML](#)
- The WebSocket protocol has been updated from version 7 to version 8
- Added an [opt-in system](#) for users to send performance data back to Mozilla to improve future versions of Firefox
- Fixed several stability issues
- Fixed several [security issues](#)

Please see the [list of changes](#) in the previous version for additional details.
